**DG FastChannel selects Cerona's XpressVu™ for DVB-S2 Broadcast**

New York – SATCON - Cerona Networks Corporation has been selected by DG Fastchannel, Inc. (DGIT: NASDAQ) to provide its industry leading XpressVu DVB-S2 Satellite Receiver for high-speed IP transmissions in support of DG FastChannel's SpotBox network, the standard in digital media services to the advertising, broadcast and publishing industries.

Cerona's XpressVu met all of DG FastChannel's objectives and as a dual tuner, it will allow DG FastChannel to receive simultaneous transmissions from two separate transponders each running up to 80 megabits per second. Cerona's best of breed technology led to DG FastChannel's upgrading its service offering.

"It is indeed gratifying and truly an honor to work with such an outstanding company like DG Fastchannel as they blaze the trail in transitioning their IP networks to DVB-S2", said Mitch Robinson, President and CEO of Cerona. "It's also exciting to see that yet again, our XpressVu products prevail in such a competitive market as the leader in DVB-S2 receiver technology, and we look forward to working with DG FastChannel in meeting their future satellite-based objectives".

**About DG FastChannel, Inc.**

**DG FastChannel** provides innovative, technology-based solutions to help advertisers and agencies work faster, smarter and more competitively. **DG FastChannel** delivers the standard in digital media services to the advertising, broadcast and publishing industries. Through its **Unicast** and **Springbox** operating units, **DG FastChannel** is also a leading Internet marketing technology company offering online marketing and advertising solutions through a powerful combination of proprietary visualization technology, and a premium rich media advertising platform for the creation, delivery and reporting of premium rich media.

The Company utilizes satellite and Internet transmission technologies and has deployed a suite of digital media intelligence and asset management tools designed specifically for the advertising industry, including creative and production resources, and digital asset management. The Company has an online media distribution network used by more than 5,000 advertisers and agencies, and over 21,000 online radio, television, cable, network and print publishing destinations.
